Contents Volume 41 (February 15, 1989)

Special Issue: Selected papers presented at the International Congress on Membranes and Membrane Processes (ICOM'87), Tokyo, Japan, June 8–12, 1987

Guest Editorial 1

Membrane transport system modeled by network thermodynamics
Y. Imai (Osaka, Japan) 3

Gas permeation and separation by an asymmetric polyimide hollow fiber membrane
K. Haraya, K. Obata, N. Itoh, Y. Shndo, T. Hakuta and H. Yoshitome (Ibaraki, Japan) 23

Analysis of the permeation of CO_2 through glassy polymers
K. Toi, H. Takai, T. Shirakawa, T. Ito and I. Ikemoto (Tokyo, Japan) 37

SO_2 separation from gaseous mixtures by membranes
Y.I. Dytnerskii, G.G. Kagramanov, I.P. Storozhuk and N.F. Kovalenko (Moscow, U.S.S.R.) 49

Characterization of ultrafiltration membranes: cut-off determination by gel permeation chromatography
G. Schock, A. Miquel and R. Birkenberger (Baden, Switzerland) 55

Permoporometric study on ultrafiltration membranes
S. Munari, A. Bottino and P. Moretti (Genoa, Italy), G. Capannelli (Messina, Italy) and I. Becchi (Florence, Italy) 69

Enhanced ultrafiltration flux rates by enzymatic hydrolysis in protein recovery from wheat starch effluent
J.L. Harris and M. Dobos (Melbourne, Australia) 87

Clarification of technical sugar solutions through a dynamic membrane formed on a porous ceramic tube
S. Kishihara, H. Tamaki, S. Fujii and M. Komoto (Kobe, Japan) 103

Fouling of ion-selective membranes during electrodialysis of grape must
R. Audinos (Toulouse, France) 115

Electronically conductive mineral membranes designed for electro-ultrafiltration
C. Guizard, F. Legault, N. Idrissi, A. Larbot, L. Cot and C. Gavach (Montpellier, France) 127

Transport numbers in a perfluorocarboxylate cation-exchange membrane
M. Suhara (Fujisawa, Japan) and K. Suzuki, H. Horie and T. Shimohira (Yokohama, Japan) 143

Synthesis of ion-exchange membranes by radiation grafting
B. Chakravorty (Patiala, India) and R.N. Mukherjee and S. Basu (Bombay, India) 155

Photoreduction of methylene blue in Nafion membrane
A.M. Mika, K. Lorenz and A. Szczurek (Wrocław, Poland) 163

Electrokinetic phenomena in amphoteric membranes
Y. Hirata, Y. Yamamoto, M. Date, A. Yamauchi and H. Kimizuka (Fukuoka, Japan) 177

Ion transport mediated by inverted micellar aggregates across a phosphatidylcholine–octanol liquid membrane
K. Kaibara, K. Ito, H. Kimizuka, K. Miyakawa and S. Kaneshina (Fukuoka, Japan) 187

Phenol permeation through liquid surfactant membrane — permeation model and effective diffusivity
T. Kataoka, T. Nishiki and S. Kimura (Osaka, Japan) 197

Separation of liquid mixtures by membrane distillation
C. Gostoli and G.C. Sarti (Bologna, Italy) 211
Sucrose bioconversion in membrane reactors
M. Cantarella, L. Cantarella, G. Cirielli, A. Gallifuoco and F. Alfani (Naples, Italy) 225
Biotechnological applications of thermophilic ATP synthase: membrane electronics and genetics
Y. Kagawa, S. Ohta, M. Yohda, T. Hamamoto and H. Hirata (Tochigi-ken, Japan) 237
Analysis of the carbohydrate-binding specificity of lectin-conjugated lipid vesicles which interact with polysaccharide fragments
N. Yamazaki (Ibaraki, Japan) 249
Transformation from mixed micelles to vesicles
M. Ueno, N. Tanaka and I. Horikoshi (Toyama, Japan) 269
Determination of microbes and immunoglobulins using a piezoelectric biosensor
H. Muramatsu (Chiba, Japan) and E. Tamiya and I. Karube (Yokohama-shi, Japan) 281
Micro-FET biosensors using polyvinylbutyral membrane
M. Gotoh (Fujisawa, Japan) and E. Tamiya and I. Karube (Yokohama, Japan) 291
Membranes for biomedical applications: utilization of plasma polymerization for dimensionally stable hydrophilic membranes
M. Karakelle and R.J. Zdrahala (Dayton, OH, U.S.A.) 305
Determination and kinetics of platelet adhesion onto material surfaces
N. Tateishi, M. Okazaki and T. Shiga (Ehime, Japan) 315
Animal cell culture engineering using alginate polycation microcapsules of controlled membrane molecular weight cut-off
M.F.A. Goosen, G.A. King, C.A. McKnight and N. Marcotte (Kingston, Ont., Canada) 323
Electrical parameters of erythrocyte membranes deduced from radiowave conductivity measurements
A. Bonincontro, C. Cametti and A. Rosi (Rome, Italy) and L. Sportelli (Calabria, Italy) 345
Ion transport and cation–polyanion interactions in vascular biomembranes
G. Siegel, A. Walter and M. Bostanjoglo (Berlin, F.R.G.) A.W.H. Jans and R. Kinne (Dortmund, F.R.G.) and L. Piculell and B. Lindman (Lund, Sweden) 353
Electro-osmotic flow measurements
M. Miyamoto, T. Nakahari, H. Yoshida and Y. Imai (Isaka, Japan) 377
Network synthesis of the epithelial transport system
Y. Imai, H. Yoshida, M. Miyamoto, T. Nakahari and H. Fujiwara (Osaka, Japan) 393
Thermochemical studies of energetics in active transport across *Escherichia coli* membranes
L.-I.S. Chen and C.-H. Chen (Albany, NY, U.S.A.) 405
Meetings Calendar 417
